

Whether you are making a boneless ham, deli meat, breakfast sausage or other food product, Vista is your single source for the highest quality and best total value food packaging.

While our new logo reflecting our worldwide relationships is only a few months old, Vista's team has hundreds of years of total experience in the food packaging industry. From our professional customer care specialists, top notch sales and technical representatives, to our dedicated production personnel, our expertise and desire to find the best solution for your packaging needs is unrivaled.

This quick fact sheet highlights some of the product application solutions that we can help you with today!

BONELESS HAM

We understand the challenges you face when making a ham, and we have solutions for just about every boneless ham application. Vista's **Fibrous** casings offer a multitude of inner surface treatments, along with a wide variety of colors and sizes. With tight diameter control and long shirred tube lengths, your yield and productivity will be excellent. After cooking, our **Durashrink® Shrink Bags** by Winpak offer exceptional clarity and performance for outstanding finished appearance in the deli case. Printable up to ten colors with photographic process print capabilities, you can eliminate wrinkled labels and reduce your labor costs. For large ham mold products, our **Nova High Barrier Plastic Casings** are a great choice. With long shelf life capabilities and virtually no moisture loss, using this packaging is your gain! For smoked or flavored boneless hams, try our **Solution Transfer Barrier (STB)** casing, which combines the excellent barrier characteristics of film with the strength and smoke transfer properties of fibrous casings. STB is ideal when making hams for hotels, restaurants and other institutions.

BREAKFAST SAUSAGE

Making breakfast sausages requires excellent uniformity for maximum yield and consistent package weights. Vista's **Nippi® Edible Collagen Casings** are one of the most uniform casings in the world. The flavor profile and

bite of Nippi® enhances your customers taste experience, bringing them back time after time. With a Vista **High Barrier Zipper Pouch**, create a value added solution for your customers! Sizes, colors and structures to achieve the profile your customer will come back for.

DELI MEATS

Making product for the deli counter requires great finished appearance, maximum yield and the ability to catch the shopper's attention. Vista's **Nova High Barrier Plastic Casing** is an excellent choice when you want it all. **Nova** has excellent moisture and gas barrier properties, shrink characteristics to provide a smooth, wrinkle free finish, and a tremendous selection of colors available. Vista's **Fibrous** casings provide a natural appearance, with flavor and smoke solutions, 52 sizes and two dozen colors to choose from! For your non-smoked cooked sausage needs, check out our new **Moisture Barrier Fibrous** packaging! For high barrier applications requiring extended shelf life and reduced handling, our **Solution Transfer Barrier (STB)** is a unique combination of fibrous and film that offers consistent color, flavor and high yield that customers expect. For an exceptional gloss, contact clarity and finished packaging profile, choose Vista's **High Barrier Forming and Non-forming Films** by Winpak. Our films run easy and efficiently on your equipment. With a wide variety of types and gauges to choose from, you will gain a 'clear' advantage!

DRY SAUSAGE

Our **Fibrous** is a great selection when making dry sausage products! With 52 sizes and over two dozen colors to choose from, your product's appearance will stand out in the marketplace. Get a sharp look for your dry salami with our bright white fibrous, or use our deep mahogany to set a traditional tone. For strip off applications such as pepperoni, we have a variety of meat cling levels to create the finished look you want, giving you maximum yield and maximum marketability! For a classic look with the casing on, our **Collagen** casing creates an old world look that reflects the rich experience of the sausage maker. Vista's **High Barrier Forming and Non-forming**

Over 35 years of Service to the Food Industry!

Films by Winpak are a great way to complete your package. The high clarity of our films makes your product stand out. From salami to summer sausage, we've got you covered!

SLICED MEATS

Whether leaving the casing on or taking it off, making sliced product has never been easier than with Vista's **Fibrous!** Advanced size control and a variety of meat cling gives you consistent performance, slice after slice! Our customized smoke impregnation process will create a flavor profile your customers will love, while reducing your costs and environmental impact of atomized smoke usage. We also have a variety of release coatings and our Insty® pre-moisturized casings to save soak time and materials. Try **Solution Transfer Barrier (STB) and STB Light** packaging when you need excellent yield, color/flavor transfer as well as safe handling and storage prior to slicing. Select Vista's **High Barrier Forming and Non-forming Films** by Winpak for packaging your sliced meats. From easy open to resealable packages, our technical specialists will help make your product a hit in the self service deli cooler.

DAIRY PRODUCTS

Cheese products are a staple of Wisconsin, where Vista is located. Our **Durashrink® Shrink Bags** by Winpak have a gentle shrink that does not deform your product, and the high clarity gives your product a clear advantage. For creating cheese logs for slicing, **Nova High Barrier Plastic Casings** is a great choice. Whether you are slicing in house or going to retail, **Nova** casing provides consistent sizing, great barrier properties and with over 40 colors and finishes to choose from, your product will stand out in the marketplace! We can also print up to eight colors in high quality process print to bring your packaging designs to a new level.

DINNER SAUSAGE

Our **Nippi® Edible Collagen Casings** are a great choice. Available in custom colors to highlight your flavor variety for fast market recognition and brisk sales! If you are

using hog casings, why not try **Nippi®**, one of the most uniform casings produced in the world. Our technical specialists can help you 'dial in' your link size, diameter and weight to create the exact product you want. Nippi is produced to exacting ISO-9001 quality controls and meets all strict Japan sanitation laws. When safety, reliability and performance count, **Nippi®** is the solution! By adding Vista's **High Barrier Forming and Non-forming Films** by Winpak, we can offer a whole package solution. With a choice of sealant types, variety of popular stock products and low minimum order quantities, it's easy to get started!

MEAT SNACKS

When you are making meat snack sticks, **Nippi® Edible Collagen Casings** will give your product the bite that brings customers back for repeat sales. Available in small diameters and a great color selection, our technical specialists can help you create the bite profile you want. The world class uniformity of **Nippi®** gives you the maximum yield with every package. We can also provide you the outer package, whether it is a pouch, shrink bag or film. Give your sales a boost with our **High Barrier Forming and Non-forming Films** by Winpak! Our films are easy to run on your equipment, and the high gloss and clarity make your package shine.

FORMED / FROZEN

For frozen meat applications such as ground beef or pork sausage, or in-house stuff, cook and strip applications, our **Stuff, Cook, Freeze (SCF)** plastic casing is a great economical choice. With outstanding moisture barrier properties and a variety of colors available from vivid white to color tints for easy product identification and removal verification, SCF offers the quality and value to fit your application and budget. We also have our **Frozen Red Meat Films** by Winpak as another great option!
